SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

## Changes in Section SF 30

### Q&A concerning technical clarifications:

Q1. "What is the reason for this limit?"(2,300 cy scow/trip)...

A1. We are required by EPA Ocean Dumping regulations to evaluate water quality impacts resulting from disposal of dredged material at open water sites. EPA Region 2 requires use of the STFATE model; one aspect of the model indicates the maximum allowable volume of material per barge load, which would result in acceptable concentrations of dredged material in the water column 4 hours after dredged material placement; 2300 cy was determined to be the maximum volume.

Q2. Does the Corps recognize that this will significantly increase the cost of performing this dredging?"

A2. The government estimate will reflect the cost of transporting dumping this reduced quantity of dredged material.

Q3. "How will the Corps monitor and enforce this limit?"  
"what are the penalties if this limit is exceeded?"

A3. The disposal inspector will note on the disposal log for each trip the estimated volume per barge load, through visual inspection of the barge and use of barge loading tables. Any exceedence of this maximum volume could be grounds for a regulatory enforcement action, the penalty to be determined based on severity of of the violation & its impacts to the environment.
